Re: **Proposal for Preliminary Soil Study**
Proposed Event Pavilion
26389 Canal Road
Orange Beach, Alabama

Dear Mr. Smith:

GeoCon Engineering & Materials Testing, Inc. is pleased to have the opportunity to provide a proposal for geotechnical testing and engineering services for your proposed event center. We understand the project includes a new 2,800 square foot building built on a shallow foundation. The purpose of the investigation will be to determine the subsurface soil and ground water conditions in the footprint of the proposed new building.

Proposed Scope of Services

The proposed geotechnical exploration includes four (4) Cone Penetration Test (CPT) soundings to depths of about 15 feet located in the footprint of the proposed event center. A geotechnical technician will be on-site during portions of the field exploration to locate the boring points and observe the soil conditions encountered in the borings.

The purpose of our investigation will be to determine the subgrade soil conditions in the proposed construction areas and make recommendations regarding site grading, subgrade preparation and foundation design.

Geotechnical Report

The collected CPT sounding data will be evaluated by our engineering staff. The geotechnical investigation will be used to make recommendations regarding site grading and subgrade preparation along with recommendations for foundation design and construction. The geotechnical report would be prepared and signed by a registered Professional Geotechnical Engineer licensed in the State of Alabama.

Fee Estimate

Based on the proposed testing and engineering work scope, we can provide preliminary geotechnical testing and engineering services for a cost of \$3,275.00.

Scheduling

We could proceed with the drilling and sampling within 2 weeks following your notice to proceed. We estimate that drilling and sampling would be completed in 1 day, weather permitting. A completed preliminary soils report could be available within about 2 weeks following completion of the boring.

Testing Standards

Our work on this project will be completed in general accordance with applicable ASTM standards and with generally accepted current standards of geotechnical engineering practices. We maintain general and professional liability insurances in amounts typically acceptable for similar projects. A copy of our insurance certificates can be obtained at your request.

Authorization

To authorize us to proceed with the above-described geotechnical services, please complete the authorization form and return to this office for our file. GeoCon's Terms and Conditions, which are attached hereto, are hereby incorporated by reference as if fully set forth herein. By signing this Proposal, Client acknowledges and agrees that he/she has read the Terms and Conditions and agrees to be bound by the terms and conditions set forth therein.

We appreciate the opportunity to provide a proposal for this project. Please feel free to contact our office if you have any questions or if you need any additional information.

Sincerely,

GeoCon, Inc.

Thomas A. Rachel
Operations Manager

Proposal Authorization Form
